SUMMARY

Full-Stack Software Engineer with 3+ years of experience building web applications with React, Angular, TypeScript, Java and Python on PostgreSQL. Focused on maintainable, scalable features, clean architecture and LLM-based developer tools.

EXPERIENCE

- Osmosit** Remote
Full-Stack Software Engineer 2023 – Present
 - Built and maintained production features across 5 Angular (17–20, TypeScript) applications, including 80+ UI components for a school simulation platform (33+ routes) and admin, monitoring and analytics consoles for a regional healthcare data-flow suite.
 - Designed and delivered a Spring Boot REST service (OAuth2/Keycloak, OpenAPI, JPA entities, JUnit tests) for uploading, validating and submitting healthcare data flows to NSIS; built integration services for Sogei SistemaTS (REST, JWT-signed) and INPS (SOAP) and embedded Superset dashboards, for 7 internal and third-party systems overall (Keycloak, NSIS, Sogei SistemaTS, INPS, Superset, ActiveMQ, Parse).
 - Modeled PostgreSQL entities for state-driven submission workflows and optimized rejected-record retrieval by replacing an N+1 query pattern with a single query.
 - Owned features end-to-end and drove technical decisions within the team, designing solutions from data modeling and API architecture to UI implementation; delivered Keycloak client management, data-driven registry editing and feature-flagged modules with Docker/GitLab CI.
- Pucciufficio Srl** Perugia, Italy
Back-End Developer 2023
 - Developed custom C# and SQL solutions on the eSolver ERP for multiple client companies, automating business processes and reducing manual work.
 - Translated client requirements into software features, database queries and integrations.
- VIGAMUS Academy** Remote
C# / Unity Developer 2020 – 2021
 - Implemented gameplay mathematics and physics systems in Unity and C# for an unreleased game scene.

PROJECTS

- Terrain Forge** (*Electron, TypeScript, Three.js, Vitest*): Offline desktop tool for procedural terrain and dungeon generation (Perlin/Simplex noise, hydraulic erosion, BSP dungeons) with live 3D preview and export to PNG, OBJ and Tiled TMX; unit-tested core, Windows/Linux releases. [GitHub](#)
- FINTECH** (*Next.js, TypeScript, Supabase, Tailwind*): Personal finance web app with custom budget periods, recurring templates that auto-generate pending transactions, multi-account transfers and real vs. projected balance, plus charts; Supabase Auth/PostgreSQL, deployed on Vercel. [GitHub](#)

TECHNICAL SKILLS

- Frontend:** React, Next.js, Angular, TypeScript, Tailwind CSS, Three.js
- Backend:** Java, Spring Boot, C#, Python, Node.js (Express), REST APIs, JPA/Hibernate, OAuth2, Keycloak, SOAP/CXF
- Databases & Data:** PostgreSQL, MongoDB, SQL, Supabase, Prisma, Apache Superset, ActiveMQ
- Tools & Testing:** Git, Docker, GitLab CI, Bitbucket Pipelines, SonarQube, Vitest, JUnit, Mockito, CI/CD, LLM integration, Claude Code

EDUCATION

- University of Perugia** Perugia, Italy
BSc in Computer Science 2020 – 2023
